If the number is not answered at the time of calling – leave a message with your name, phone number and address – and give them 10 minutes to call you back.

Some of the above firms have a message as to a separate after hours number to call (depending on the staff member allocated at that time – as normally one person is not on call after hours all year), you will need to take down this number and call it for them to come out.

**Note:** if it is not an emergency they will not attend, and so you will need to contact us on the next working day as usual to arrange for a work order to be issued as normal for non-urgent repairs.
